Learning something new in the developing world is a priority everyday as it is ever changing. Possess not only the technical skills to succeed as a web developer but also have eight years experience in customer service and 2 years in management. This experience has helped develop the soft skills required to succeed in working in a team environment.

Technical Skills

JavaScript/jQuery, HTML, CSS, Bootstrap, Materialize, Node.js, MySQL, MongoDB, Express.js, React, Firebase, Web User Interface Design (UI), Web Services (REST/SOAP), Multimedia Content Development, API's, WordPress and Version Control(Git)

Projects

Invenstory

Invenstory is a web application that makes keeping your personal belongings on track. It allows users to add any appliances or furniture to their profile for their piece of mind.

- A React CRUD app that uses Node.js, Express.js, and MongoDB for the backend
- Used for Passport.js for authentication (Login and Logout)
- Used EJS and Bootstrap for templating the Front-End

WellNest

WellNest is a to-do application where you can create, read, update and delete. While at the same time, implementing different workout plans that you can use and track your nutrition daily

- Front-End: HTML / CSS, and Javascript/jQuery
- Back-End: Sequelize, Express, Node.js, Passport.js, MySQL
- Frameworks: Bootstrap and Flexbox
- Some other tools: JSON/Ajax
- APIs: FatSecretAPI

TrailFinder

The main goal is to help you find a trail that's close to you. For convenience, also included the weather condition as well as some other important details about the trail.

- Front-end: HTML / CSS, and Javascript.
- Frameworks: Materialize (for CSS3)
- Some other tools: Google Fonts, Fonts Awesome, Moment.js
- APIs: Google Maps API, Hiking Project API, and Weather API

Past Experience

Freelance Web Developer   2018 - Current

As a self-employed professional, design websites for clients. Responsibilities include:

- Making website development proposals
- Designing page layout and working with content management systems
- Making sure work follows the client's branding policy
- Lots of code, and collaborating with graphic designers and content writers.

First Republic Bank   2016 – 2018

Consumer Services Associate II
As the Associate II:

- Provided technical support by troubleshooting
- Problem solving for clients experiencing difficulties using all retail applications available on First Republic's website and Mobile App.
- Responsible for providing excellent client service to both external and internal clients via phone, e-mail, or onsite requests.
- Management: had to prove proficiency in preparing reports and correspondence with the types of calls and concerns from clients.
- Assisted with the administration and training programs for new hires.
